

# SETH SORRELL

## Computer Science Student — Full-Stack Software Developer

Kokomo, IN | 765-513-8771 | smsorrell27@gmail.com

linkedin.com/in/seth-sorrell-2b7040406 | github.com/SethSorrellDev | seth-sorrell-portfolio.onrender.com

Computer Science student (B.S., expected 2028, 4.0 GPA) with a self-directed portfolio of four deployed full-stack applications unified by a shared identity service. Experience spans Java/Spring Boot, Python/Flask, and React/Angular/TypeScript, with real production deployments, automated testing, and CI pipelines rather than tutorial-only projects.

## EDUCATION

### Indiana University Online — B.S. Computer Science

Expected 2028

GPA: 4.0

### Ivy Tech Community College of Kokomo — A.S Software Developer

2024-2026

GPA: 3.5

## TECHNICAL SKILLS

**Languages:** Java, Python, TypeScript, JavaScript, SQL, HTML/CSS

**Frameworks:** Spring Boot, Flask, React, Angular, SQLAlchemy, Tailwind CSS

**Tools & Platforms:** Docker, GitHub Actions (CI/CD), PostgreSQL, Git, Render

**Concepts:** REST API design, JWT/OAuth2 auth, RBAC, algorithm design, automated testing (Mockito, MockMvc, Vitest, pytest)

## PROJECTS — SETH-SORRELL-PORTFOLIO.ONRENDER.COM

### FleetCheck

Spring Boot · React · TypeScript · Docker · PostgreSQL

- Built a full-stack vehicle inspection system with four-role RBAC (driver, mechanic, fleet manager, admin) enforced through Spring Security and a formal inspection state machine.
- Designed an interactive SVG vehicle diagram for click-to-report damage; deployed via a two-stage Docker build with managed PostgreSQL, covered by 37 backend and 22 frontend automated tests.

### RouteOptimizer

Flask · PostgreSQL · Leaflet · OpenRouteService

- Implemented a Vehicle Routing Problem with Time Windows (VRPTW) solver combining nearest-neighbor construction with 2-opt local search to minimize route distance under time-window and capacity constraints.
- Built a live Leaflet/OpenStreetMap dashboard with an editable plant-and-stop scheduling interface; deployed with PostgreSQL on Render.

### AssistantScheduler

Flask · SQLAlchemy · Socket.IO

- Developed a role-based workforce shift-scheduling app with real-time coverage notifications via Flask-SocketIO and a full change audit log.

### RouteBook & Shared Identity Service

Spring Boot · React · TypeScript · RSA/JWT

- Built RouteBook, the shared fleet-records system linking route, stop, and driver history across the application suite.
- Designed a standalone authentication service issuing RSA-signed JWTs via a JWKS endpoint to unify login across all four Java and Python applications.

## WORK EXPERIENCE

### Cintas Corporation — Assistant Service Sales Representative

Oct 2025 – Present

Frankfort, IN

- Helps Service Sales Representative with managing their route, unloading and loading at stops, and keeping inventory.

### Specialty Tool and Die — CNC Machinist

Jun 2023 – Aug 2025

Kokomo, IN

- Operated and programmed CNC machinery to produce precision components to tight tolerances, reading blueprints and specifications independently.

### Menards — Morning Stocker / Electrical Sales Associate

Jun 2021 – Jun 2023

Kokomo, IN

- Balanced overnight stocking with customer-facing electrical department sales in a fast-paced retail environment.

## CERTIFICATIONS

Meta Front End Development Certificate

June 2025
